SUMMARY

Motivated Python Full Stack Developer with hands-on experience building scalable web applications using Django, FastAPI, and React.js. Skilled across the full development lifecycle — API design, database optimisation, cloud deployment, and CI/CD automation. Strong foundation in data structures, system design, and test-driven development. Eager to contribute to high-impact product engineering teams.

TECHNICAL SKILLS

Languages: Python · JavaScript (ES6+) · TypeScript · SQL · HTML5 · CSS3 · Bash
Backend: Django · Django REST Framework · FastAPI · Flask · Celery · WebSockets · GraphQL
Frontend: React.js · Next.js · Redux Toolkit · Tailwind CSS · Bootstrap · AJAX
Databases: PostgreSQL · MySQL · MongoDB · Redis · SQLite · SQLAlchemy · Django ORM
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, CloudFront) · GCP · Docker · Kubernetes · Nginx · Unicorn
CI/CD & Tools: Git · GitHub Actions · Jenkins · CircleCI · Postman · Swagger/OpenAPI · JIRA · Linux
Testing: Pytest · unittest · Jest · Selenium · Coverage.py · TDD
Concepts: REST APIs · Microservices · OAuth2 · JWT · System Design · Agile/Scrum · OOP · DSA

INTERNSHIP EXPERIENCE

- Python Full Stack Developer Intern** · TechNova Solutions Pvt. Ltd., Bengaluru *Jan 2024 – Jun 2024*
- Built and maintained RESTful APIs with Django REST Framework for an e-commerce platform serving 50,000+ active users; reduced average API latency by 35% through query optimisation and Redis caching.
 - Developed reusable React.js components integrated with backend APIs, lifting user engagement by 20% (measured via Mixpanel).
 - Implemented JWT-based authentication and role-based access control (RBAC) for a secure multi-tenant architecture.
 - Dockerised the application and configured Nginx + Unicorn for production on AWS EC2; set up S3 for media storage.
 - Participated in 2-week Agile sprints — daily standups, code reviews, and retrospectives using JIRA.
- Backend Developer Intern** · DataBridge Analytics, Hyderabad (Remote) *Jun 2023 – Dec 2023*
- Automated Python data pipelines using Pandas and NumPy to ingest and process 2M+ records daily from third-party REST APIs.
 - Redesigned PostgreSQL schemas and rewrote complex analytical queries, cutting report generation time by 40%.
 - Built a Flask internal dashboard for real-time KPI visualisation, adopted by 30+ analysts within the first sprint.
 - Integrated Celery + Redis for async task processing — background jobs include email dispatch, PDF generation, and data exports.
 - Achieved 85%+ code coverage across all new modules using Pytest and Coverage.py.
- Web Development Intern** · CloudSpark Technologies, Pune (Hybrid) *Dec 2022 – May 2023*
- Contributed to a Django-based CRM web app managing 500+ client records; built admin views and search filters.
 - Created mobile-responsive UI components with HTML5, CSS3, and Bootstrap; cross-browser tested with Selenium.
 - Integrated Razorpay payment gateway and Twilio SMS API; handled webhook verification and error fallback flows.
 - Migrated key modules from Python 2 to Python 3 with zero downtime; updated CI scripts accordingly.
 - Authored Swagger/OpenAPI documentation for 25+ endpoints, reducing new-dev onboarding time by ~30%.

PROJECTS

ShopEase — Full Stack E-Commerce Platform | Django · React.js · PostgreSQL · Redis · AWS · Stripe 2024

- Architected a production-grade e-commerce system with product catalogue, cart, order management, and real-time inventory; deployed on AWS EC2 + RDS with CloudFront CDN — 99.9% uptime.
- Integrated Stripe payment gateway with webhook handling for order confirmation, refunds, and dispute management.
- Implemented Redis caching layer reducing DB queries by 60% under peak traffic; used Celery for async order emails.
- github.com/debashissahoo2004-cloud/shopease

TaskFlow — Collaborative Project Management SaaS | FastAPI · React.js · MongoDB · Docker · GitHub Actions 2023

- Built a real-time task board (Trello-like) with drag-and-drop, WebSocket live updates, comments, and team workspaces.
- Designed FastAPI + MongoDB backend with OAuth2 social login (Google, GitHub) and JWT refresh-token rotation.
- Containerised with Docker Compose; GitHub Actions CI/CD pipeline runs Pytest + Jest on every PR before auto-deploy.
- github.com/debashissahoo2004-cloud/taskflow

SmartBlog — AI-Powered Blogging Platform | Django · Next.js · OpenAI API · PostgreSQL · Tailwind CSS 2023

- Built SSR blog platform with Next.js — Lighthouse score 96; integrated OpenAI GPT API for AI writing assistance.
- Django admin CMS for content moderation; PostgreSQL full-text search for fast post discovery across 1,000+ articles.
- Cloudinary CDN for image delivery; implemented rate-limited public API for third-party embeds.
- github.com/debashissahoo2004-cloud/smartblog

EDUCATION

B.E. Computer Science Engineering · GITA Autonomous College, Bhubaneswar 2022 – 2026

- Relevant coursework: DSA, DBMS, Computer Networks, Software Engineering, Operating Systems, Cloud Computing
- Final Year Project: AI-powered resume screening system (spaCy + BERT) — awarded Best Project in the department.

Higher Secondary (Class XII) · Sri Aurobindo Integral Education Center 2020 – 2022

- Stream: Science (PCM) · Board: CHSE Odisha

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2024)
- Meta Back-End Developer Professional Certificate – Coursera (2023)
- Python for Everybody Specialisation – University of Michigan, Coursera (2022)
- The Complete React Developer Course – Udemy (2023)

ACHIEVEMENTS

- Winner — HackIndia 2023 (Top 10 nationally, 2,000+ teams): built a disaster-response coordination platform in 36 hrs.
- Open Source: merged bug fixes and docs PRs into Django REST Framework and FastAPI upstream repositories.
- Technical Blog: 15+ articles on Python & web dev — 5,000+ monthly readers.
- GirlScript Summer of Code 2023 Mentor: guided 12 contributors in Python backend and open-source workflows.
